RE:

DELTA

Dear Howard:

In accordance with our conversation on 2 April regarding the Delta patent effort, I would suggest that you arrange with George Brandt to come down to meet with us in the next few days. The purpose of the meeting is to discuss the mechanical aspects of the invention. George and I briefly discussed this during his last trip to PM, and it is possible that the mechanical details can be addressed in a separate application.

Since Terri is not available at the moment, I feel we should not let the effort flounder, but rather address those details which can be readily dealt with now. Obviously we can use George's assistance now, and he and Terri can compare notes and determine the best approach when she returns.

Since we all agreed to a April 30 deadline, I believe this course of action will serve to expedite matters in order to meet the target date.

Very truly yours,

Susan A. Hutcheson
